Strategy Session

September 10, 2025

Dan discussed the upcoming CPI report's impact on Federal Reserve interest rate decisions and criticized President Trump's influence on Jerome Powell's rate cuts. He provided analysis of various stock market trends and specific stock performances, noting that most of his trades were performing well with several stocks showing double-digit gains. Dan recommended staying patient and focused on successful investments, particularly in gold-related assets.

Next Steps:

1. All attendees to monitor CPI data release tomorrow as it will impact Fed rate decision.
2. All attendees to watch for potential market reaction to Fed rate decision next week .
3. All attendees to consider maintaining long positions in stocks showing strong uptrends.
4. All attendees to monitor WULF stock for potential pullbacks as entry points.
5. All attendees to watch Core Weave for possible pullback before entering position.
6. All attendees to maintain positions in crypto miners that are showing strong performance.
7. All attendees to monitor Rigetti stock for breakout above resistance level.

Transcript:1

00:00:01.670 --> 00:00:02.980

Dan Fitzpatrick: Okay,

2

00:00:03.020 --> 00:00:22.140

Dan Fitzpatrick: I'll get going here. I got this going a little bit early today, not too much, actually, but I'll get started. So, the PPI came in a little bit lighter than expected, which, makes the CPI a pretty important, thing tomorrow, because if the CPI is also down.

3

00:00:22.140 --> 00:00:27.409

Dan Fitzpatrick: then the Fed actually will not have any excuses.

4

00:00:27.410 --> 00:00:34.260

Dan Fitzpatrick: In my view, anyway, you could… I could be totally wrong. They won't have any excuses to not drop

5

00:00:34.260 --> 00:00:53.540

Dan Fitzpatrick: By 50 basis points. I mean, the, the jobs numbers have been abysmal, and all these revisions, almost a million flippin' jobs that were imaginary, last year. So a lot of magical thinking going on last year, but nobody knew that it was that bad. So, it is.

6

00:00:53.540 --> 00:00:57.579

Dan Fitzpatrick: We've got the data for that. The Fed says they're data dependent.

7

00:00:57.580 --> 00:00:58.660

Dan Fitzpatrick: They're not.

8

00:00:58.660 --> 00:01:16.349

Dan Fitzpatrick: But they say they are. So, the bottom line is, if we have a tame CPI number, in my mind, the only way they're gonna only drop 25% is because Jumpin' Jerome Powell wants to save face. You know, he… and I've mentioned this before.

9

00:01:16.350 --> 00:01:34.330

Dan Fitzpatrick: Like, the crap that Trump pulls is just abominable. I like what the guy's doing, but I don't like him. But I like virtually everything that he's doing, just to lay that out there. But the insults, the personal insults and stuff like that, guys, it's moving in the wrong direction.

10

00:01:34.480 --> 00:01:37.259

Dan Fitzpatrick: I mean, if I… I mean, here's the thing, I'll be…

11

00:01:37.520 --> 00:01:42.320

Dan Fitzpatrick: Right up front. If I was to personally insult, members.

12

00:01:42.820 --> 00:01:56.299

Dan Fitzpatrick: That member, or those members, or whatever would probably go away. I would if the situation were reversed, okay? I would. But also, it goes further than that. Other people see how you are.

13

00:01:56.300 --> 00:02:07.189

Dan Fitzpatrick: And they don't… they start to not like you very much. So, that is one of the bigger objections that I have, in this case. But,

14

00:02:07.340 --> 00:02:09.389

Dan Fitzpatrick: He's actually made it…

15

00:02:09.410 --> 00:02:31.670

Dan Fitzpatrick: easier for Powell to just cut 25 basis points, which is basically just kind of giving him the bad finger. So we'll see. We'll see how this goes. It's… it's interesting in a lot of different ways, to me, but the fact that all the other banks on the planet, just this one, I don't know what they're doing in Uranus,

16

00:02:31.670 --> 00:02:36.930

Dan Fitzpatrick: Which isn't really a planet, but I just went there. Anyway,

17

00:02:37.010 --> 00:03:00.999

Dan Fitzpatrick: I don't know what they're doing in all these other countries as far as why they're lowering their rates, but they are. We're the only ones, that aren't. And so, if the Fed next week does drop… I mean, if they drop 25 bips, it could kind of be a sell the news thing. But if they drop 50 basis points, we could actually get a squirt higher. So, just kind of be…

18

00:03:01.000 --> 00:03:09.299

Dan Fitzpatrick: be aware of what's going on right now. I think the CPI's gonna be pretty important, tomorrow, and I did, lay out

19

00:03:09.300 --> 00:03:16.309

Dan Fitzpatrick: a little bit more information, a little bit more detail in this morning's note, than in what I'm doing here, so…

20

00:03:16.760 --> 00:03:29.509

Dan Fitzpatrick: Anyway, so, the S&P and the diamonds are just kind of treading water. There's really nothing wrong with these trends here. Got a big V here, but I could look at this virtually all the way up and say.

21

00:03:29.510 --> 00:03:48.000

Dan Fitzpatrick: Okay, well, that's the end of that. Oh, it's gonna keep going. Oh, that's the end of that. That's definitely the end of that. Oh, see, it was absolutely the end of that. Oh, wait, it's gonna keep going. I mean, you can go on and on about this, but as long as the weekly chart shows this kind of uptrend, I think it's good to stay.

22

00:03:48.000 --> 00:03:52.779

Dan Fitzpatrick: I think it's just good to stay long. The, queues…

23

00:03:52.840 --> 00:04:00.019

Dan Fitzpatrick: Just drifting around doing basically nothing, this one, the fangs here.

24

00:04:00.820 --> 00:04:25.300

Dan Fitzpatrick: you can add, Broadcom to that as well. But the FANGs are doing really, really well here. I think it's a good… this is actually kind of a good ETF to own. Also, by the way, this is another one. It's not where you want to be buying today. Granny. Granny Shots. You can look… you can look it up and get more information on it. I… I mentioned in the

25

00:04:25.300 --> 00:04:37.310

Dan Fitzpatrick: webinar this morning in the CMM webinar. I had a chance to chat with Tom Lee last night. He was out here in Huntington Beach with his crew. They're all super nice people.

26

00:04:37.310 --> 00:04:56.519

Dan Fitzpatrick: Anyway, they were… they're all wearing granny t-shirts, because that's his, deal. So, bottom line is, though, I like the way… I like the way he manages this. What I'd be waiting for is an entry, because this is not it. But definitely, I think it's… it's really one to watch.

27

00:04:56.520 --> 00:05:14.039

Dan Fitzpatrick: Okay, now, the mid caps and the small caps, I think they're doing fine. They should also move next week. I don't really think they'll move much on a 25 cut, because the market's already pricing all of that in. But if it's a 50,

28

00:05:14.040 --> 00:05:32.430

Dan Fitzpatrick: Then that could… that could work. Because the jobs numbers show that the mid and the small cap companies, smaller businesses, they're the ones that are struggling. It's hard to get loans. I know a guy who can't get a business loan, and he actually has a rockin' business.

29

00:05:32.430 --> 00:05:37.679

Dan Fitzpatrick: And so, when rates are lower, it's gonna help the overall economy.

30

00:05:39.050 --> 00:05:46.249

Dan Fitzpatrick: you could say, well, Dan, you should be in the Fed. And I would say, no. You know what rhymes with Fed? Dead.

31

00:05:46.510 --> 00:06:05.369

Dan Fitzpatrick: Not gonna happen. So, Wolf, I was looking at this today. It was something that Scott had actually mentioned, in the, in the CMM, webinar today. I don't know anything about this, I think it has some… it has something to do with crypto, but this is a blatant power move.

32

00:06:05.370 --> 00:06:13.009

Dan Fitzpatrick: This stock ramped up over 50%, so it's almost to 90% in just a few days.

33

00:06:13.430 --> 00:06:17.449

Dan Fitzpatrick: And that's great, okay? But it didn't pull back.

34

00:06:17.710 --> 00:06:35.700

Dan Fitzpatrick: It didn't pull back. Instead, it's drifted sideways on declining volume. What this tells you is there's not, even despite this big, massive move, there's not a lot of selling. There's not a lot of selling pressure. You can't say that this was a climax top, a blow-off top.

35

00:06:35.700 --> 00:06:43.040

Dan Fitzpatrick: This is still consolidating here, and then it's starting to kind of trickle out the upside, printing another new high.

36

00:06:43.050 --> 00:06:47.899

Dan Fitzpatrick: I… I mean, you could buy it if you want, it's,

37

00:06:49.000 --> 00:07:06.149

Dan Fitzpatrick: I'd say it's kind of a… it's a higher risk trade, but I've just kind of given you the analysis. There's enough buying pressure to hold it up here, and there's not enough selling pressure to put it down, despite the move that it's already made. So, I think that, as I see this.

38

00:07:06.510 --> 00:07:22.050

Dan Fitzpatrick: This frankly, looks to me like it could have a $15 handle on it pretty easy, but it's not going to be in a straight line. Any pullback, as long as it holds here, I think that would be your Huckleberry, right there. Okay, and then Core Weave.

39

00:07:22.490 --> 00:07:33.909

Dan Fitzpatrick: Big, big move today, but it moved right into the 50-day moving average, and that, created a parallel line. Good for me.

40

00:07:34.980 --> 00:07:52.700

Dan Fitzpatrick: A move into the 50-day moving average is really not, where you want to buy the stock, so hopefully the stock will pull back a bit, but there's just too much supply overhead here. Massive volume. This is gonna go higher. It absolutely will go higher.

41

00:07:52.740 --> 00:07:57.010

Dan Fitzpatrick: I just don't know if it's gonna go higher from here, or maybe pull back.

42

00:07:57.020 --> 00:08:12.539

Dan Fitzpatrick: A bit. Okay, I got a lot to go through in the active trade list. I put, a few of the crypto miners, the Bitcoin miners, on yesterday, and the reason that I did, frankly, was because they were all looking good.

43

00:08:12.540 --> 00:08:19.009

Dan Fitzpatrick: That's the only reason. I was… it was, remarkable that they're all moving up together. That…

44

00:08:19.070 --> 00:08:28.679

Dan Fitzpatrick: tells me something. It should tell you something. But I looked at each of these stocks individually, and so this one, up really, really well.

45

00:08:29.110 --> 00:08:31.020

Dan Fitzpatrick: Let me get the,

46

00:08:34.340 --> 00:08:38.379

Dan Fitzpatrick: I'll do this, just a real quick… Rundown.

47

00:08:39.070 --> 00:08:39.900

Dan Fitzpatrick: Here.

48

00:08:40.220 --> 00:08:43.499

Dan Fitzpatrick: Okay, so you can see,

49

00:08:43.500 --> 00:09:03.390

Dan Fitzpatrick: We're doing really well on our, on our profits here. We got a lot of stocks that are up over 10%. We only have 2 that are down, and they're not down much, like, by not even a point. And so I'm really happy with the way, these things are working out. Okay, so, put on CFR.

50

00:09:03.390 --> 00:09:08.430

Dan Fitzpatrick: I raised the stop, raised the stop to 820.

51

00:09:08.430 --> 00:09:19.950

Dan Fitzpatrick: And that still gives this a lot of room, like, almost 20%, but it's that volatile. And so you can keep your stop wherever you want. You want to keep it lower.

52

00:09:19.950 --> 00:09:29.110

Dan Fitzpatrick: Great. If you want to keep it higher, great. If you want to not have a stop at all, great. Your money, your trade, your profit, your loss, your decision.

53

00:09:30.730 --> 00:09:37.209

Dan Fitzpatrick: Okay, this is another one. This, I really, really liked this yesterday, again, when it was…

54

00:09:39.370 --> 00:09:47.570

Dan Fitzpatrick: When it was doing this, it was just another stock that had pulled back to the 8-day EMA. Interesting, but… Now?

55

00:09:47.840 --> 00:10:04.010

Dan Fitzpatrick: not so interesting, really exciting. And so that's when I'm looking at this going like, okay, it broke above 30, that's pretty good. And so… but I was able to… we were able to get the stock here, and, it's… it's just working.

56

00:10:04.010 --> 00:10:19.939

Dan Fitzpatrick: really, really, nicely. I'm really, really liking the way, really liking the way this is going. We just put this on yesterday, and it's already up over 15%. So just stay long. The hardest thing to do

57

00:10:20.330 --> 00:10:24.890

Dan Fitzpatrick: On stocks that are really moving is just to let them work.

58

00:10:24.890 --> 00:10:43.160

Dan Fitzpatrick: It's actually really hard to do, because you're always… for me, and maybe it's just me, but I'm always looking at, okay, well, I'm up this much. Then I'm looking at the chart, oh, geez, you know, well, maybe I should take profits. And then I'm doing some calcs in my head about, well, what's the R-value, and this and that, and the other thing.

59

00:10:43.160 --> 00:10:51.220

Dan Fitzpatrick: And I used to be a quicker… quicker to sell. Now I'm really not, and I like to actually ride through the ebbs and flows.

60

00:10:51.220 --> 00:10:58.659

Dan Fitzpatrick: But there's a difference between ebbs and flows, and just kind of these snapback reversals that, well, like.

61

00:10:59.750 --> 00:11:11.910

Dan Fitzpatrick: Amazon comes to mind. Like, this down almost 4% today. Okay, this isn't just a little pullback. I sent out an email going, like, dude, I'm closing this trade down. That's a little pullback.

62

00:11:11.980 --> 00:11:21.059

Dan Fitzpatrick: Okay, that's a little pullback. These, actually, in isolation, each one, is a little pullback, okay? So you can ride those. This…

63

00:11:21.290 --> 00:11:26.369

Dan Fitzpatrick: This is a bad sign. So, maybe they… it's because of their… they released their…

64

00:11:26.550 --> 00:11:33.719

Dan Fitzpatrick: It looks like a box with wheels, and it's supposed to be their competition for Waymo.

65

00:11:34.430 --> 00:11:52.089

Dan Fitzpatrick: I look at that, and as far as usage for me, I would say it's more like way less, because I ain't riding in a box with no wheel, nobody, just… you might as well put me on a saltine cracker box, and I'll sit in the living room, but I'm not gonna do that deal. My bet is…

66

00:11:53.490 --> 00:12:10.710

Dan Fitzpatrick: that's gonna be a real dud. I don't think I'm alone in what I just said. So anyway, back to Hut. So it's working really well. Just let it work. Stops now at $26.15. Still pretty wide, but the stock swings, a lot. Okay, Riot.

67

00:12:10.740 --> 00:12:18.359

Dan Fitzpatrick: We got this really, really nicely. I like the way… I like the way it's trading. I think it's working really, really well.

68

00:12:19.480 --> 00:12:28.020

Dan Fitzpatrick: We are up… almost 8% on this, and this is a nice, clean breakout. Frankly.

69

00:12:29.620 --> 00:12:32.109

Dan Fitzpatrick: Frankly, if you're not… I could be…

70

00:12:32.110 --> 00:12:51.730

Dan Fitzpatrick: proven wrong on this. Happily, I don't have to take action on what I'm just saying, but if you're not long this stock and you want to buy, I still think this is viable for a longer-term trade. You're just gonna have to give it enough room to go to retrace this entire day and fall, like, just a little bit below 1526, like…

71

00:12:51.730 --> 00:13:04.820

Dan Fitzpatrick: 1525, something like that, I would require this breakout to continue in order to, in order to stay long. But this is working really well. Okay then, Meta?

72

00:13:04.910 --> 00:13:11.560

Dan Fitzpatrick: It's just kind of… kind of solid, it's not… not doing anything. This is one that we're down…

73

00:13:11.590 --> 00:13:29.060

Dan Fitzpatrick: like, a third of a percent. I think we'll continue to be down about a third of a percent for a while. This really isn't going anywhere, and I wouldn't buy it now. Netflix is another one. I wouldn't buy it now. I mentioned yesterday, I thought it was still buyable.

74

00:13:29.110 --> 00:13:44.830

Dan Fitzpatrick: And so far, I mean, it's still higher, higher, higher, low, but this is also another one. I think this has great potential once it breaks out, but so far, it's really not, doing that yet. Now, JP Morgan.

75

00:13:44.870 --> 00:13:52.150

Dan Fitzpatrick: This almost got us stopped out here. This is the thing with this. Like, this is… this is in a channel.

76

00:13:52.220 --> 00:14:00.980

Dan Fitzpatrick: That's what it is, and we can't make it something that it's not. It's in a channel, and that would mean that, the next…

77

00:14:01.590 --> 00:14:11.819

Dan Fitzpatrick: Like… this is what I'd be looking for, something like that, and then… Maybe, like, down…

78

00:14:19.540 --> 00:14:23.710

Dan Fitzpatrick: the heck. Hang on, sorry about that.

79

00:14:24.270 --> 00:14:32.779

Dan Fitzpatrick: Then maybe, like, down the following day, and just continue this. Like, that's what I can see here. So, is this a stock that I would buy right now?

80

00:14:32.890 --> 00:14:35.630

Dan Fitzpatrick: No, I wouldn't. There's no reason to.

81

00:14:35.990 --> 00:14:49.789

Dan Fitzpatrick: Robinhood, yesterday, S&P move. Awesome. Or yeah, that was Monday. It's still working, it's just it gapped up today, fallen down a little bit, but it's above yesterday's intraday.

82

00:14:49.790 --> 00:14:59.830

Dan Fitzpatrick: well above yesterday's intraday low, and actually above where it opened yesterday, so this is still doing okay, it's just ebbing and flowing. Gold?

83

00:14:59.830 --> 00:15:11.789

Dan Fitzpatrick: Doing the Bollinger Band walk, baby, right out of a squeeze, right up along the upper Bollinger Band. This is the kind of thing that you look at, and this is a squeeze, too. Like, this thing could keep going.

84

00:15:12.160 --> 00:15:15.350

Dan Fitzpatrick: This could, certainly go to $3.50.

85

00:15:15.690 --> 00:15:27.719

Dan Fitzpatrick: Probably even beyond that. I don't know, but that's just kind of what I see in this chart. But it can be difficult when you're long a stock like this, to just stay, stay long.

86

00:15:28.910 --> 00:15:33.189

Dan Fitzpatrick: sometimes doing the difficult thing is the best. App?

87

00:15:33.440 --> 00:15:35.280

Dan Fitzpatrick: Added to the S&P.

88

00:15:35.600 --> 00:15:52.890

Dan Fitzpatrick: Still going. It's actually above the upper Bollinger Band for 3 days in a row. When it pops like this, and then it doesn't pull back, that kind of tells you something. It's the same thing as I was saying with WULF, TerraWolf, where

89

00:15:54.890 --> 00:16:09.409

Dan Fitzpatrick: stock pops up like that and just doesn't really give it up. And that's a good thing. That tells you that, that this is a stock that you want to be, that this is a stock that you want to be in. Applovan is the same thing.

90

00:16:09.410 --> 00:16:17.820

Dan Fitzpatrick: You definitely want to be in, you definitely want to be in this stock. By the way, I don't mind being fully invested

91

00:16:18.000 --> 00:16:28.759

Dan Fitzpatrick: In the market, even when the market is weak, as long as each stock that I am in is strong and doing really well, I will…

92

00:16:28.880 --> 00:16:36.020

Dan Fitzpatrick: I look at that kind of thing, and then there are other times where the market could be really, really strong.

93

00:16:36.120 --> 00:16:48.170

Dan Fitzpatrick: And none of the stocks that I have are working. It's… it's happened. And then, at that point, I don't… I'm not gonna hang in there on something just because the market's strong.

94

00:16:48.170 --> 00:16:59.820

Dan Fitzpatrick: I mean, that's kind of silly. You gotta be making money with the ones that you… that you own. The old saying, you gotta dance with the one you brung. But…

95

00:16:59.870 --> 00:17:09.040

Dan Fitzpatrick: So, we have a lot of stocks that are really working, and so I'll hear about, oh, it's a top, the market's gonna sell off, this and that.

96

00:17:09.190 --> 00:17:22.039

Dan Fitzpatrick: And I just think, okay, well, good for you. You know more than I do, but here's what I do know. The stocks that I'm in are working really, really well. When will I know it's time to sell?

97

00:17:24.190 --> 00:17:29.609

Dan Fitzpatrick: There's 3 words that you gotta put at the beginning of that sentence, when they're not.

98

00:17:29.680 --> 00:17:47.970

Dan Fitzpatrick: working really, really well. It doesn't get any harder than that, as long as you realize there's a whole crap load of nuances in there. But, so, this one, BMO, we're up about 7%, it's pausing. I wouldn't expect it to be at any different price tomorrow.

99

00:17:47.970 --> 00:18:00.600

Dan Fitzpatrick: use the 8-day exponential moving average, black arrow on the green line, to give you, your direction here. Okay, Rigetti, I've been saying for a while, man, this thing, this pinch, it's…

100

00:18:00.790 --> 00:18:08.880

Dan Fitzpatrick: looking like it's ready to go, and I still think it is, but that's just why I'm watching it, and…

101

00:18:09.150 --> 00:18:27.929

Dan Fitzpatrick: I'll probably get about 19 alerts going off, because I set them all the time, right about here. If this thing pushes above this level, here, I'll just set another one, because I feel like it, then this is when you want to be taking a bigger position in the stock, because it's really pinching pretty nice.

102

00:18:27.930 --> 00:18:30.090

Dan Fitzpatrick: Okay, Palantir.

103

00:18:30.090 --> 00:18:44.539

Dan Fitzpatrick: Today's action, well, really kind of yesterday, really confirmed to me that the 50-day moving average is indeed acting as support. In other words, the uptrend continues. This is not

104

00:18:44.540 --> 00:18:45.790

Dan Fitzpatrick: was not

105

00:18:45.790 --> 00:19:10.739

Dan Fitzpatrick: a top. It would be different if it's up here, and then the stock does this, then it comes back to the 50, and then it rolls over, it starts doing this. Certainly if it does that, then you could look and say, wow, you know, okay, well, that was a heck of a run, but we're not seeing that. So we see the 50 still holding, and that's what we like, so I would just stay long… stay long the stock.

106

00:19:10.740 --> 00:19:12.579

Dan Fitzpatrick: Definitely pausing for a while.

107

00:19:12.630 --> 00:19:25.280

Dan Fitzpatrick: But I don't think you want to sell the stock. Okay, I've already talked about Amazon, that's off the list, but, I will say, look at the 20-day moving average, and you could, I have to say this.

108

00:19:26.190 --> 00:19:38.659

Dan Fitzpatrick: you could look at this and say, well, I've been waiting for an opportunity to buy Amazon at the 50-day moving average, or the 20-day moving average. And it could… this could very well

109

00:19:38.850 --> 00:19:40.060

Dan Fitzpatrick: move higher.

110

00:19:40.910 --> 00:19:57.170

Dan Fitzpatrick: Or it could move down to the 50, and then move higher. All of that stuff could happen, but I'm just kind of being true. I'm being true to the trade, that I suggested. And we were in at 221.

111

00:19:57.900 --> 00:20:00.039

Dan Fitzpatrick: And that was a month ago.

112

00:20:04.420 --> 00:20:07.140

Dan Fitzpatrick: Yeah, like… Right here.

113

00:20:07.990 --> 00:20:17.059

Dan Fitzpatrick: Yeah, got this here on this rebound. Okay, so it went up pretty nicely, I mean, 8… almost 9%. Alright, well now.

114

00:20:17.060 --> 00:20:24.919

Dan Fitzpatrick: it's down, and we're just up about 5.5% or maybe 5%, something like that. Well, I don't want to take the chance.

115

00:20:24.920 --> 00:20:44.010

Dan Fitzpatrick: that the stock's gonna continue to go and wipe out more of our profits. So, but you do what you want to do. I think a better way to go, let's say you're not in, okay, we'll just sit and wait. See what it does, see what it does tomorrow. See what it does when it tests the 50. There's no action today.

116

00:20:44.060 --> 00:20:49.429

Dan Fitzpatrick: You, you shouldn't… there's nothing that you should be doing, on this today.

117

00:20:49.780 --> 00:20:54.880

Dan Fitzpatrick: With respect to, With respect to taking a possession.

118

00:20:55.110 --> 00:20:59.930

Dan Fitzpatrick: Right now, it's a falling knife, and we just don't know if this is the butcher block… yet.

119

00:21:00.110 --> 00:21:01.790

Dan Fitzpatrick: Excuse me.

120

00:21:02.260 --> 00:21:11.379

Dan Fitzpatrick: Okay, so, Ken Ross. Look, gold just continues to work. I haven't looked at these charts, but I got a feeling I know what I'm gonna see. Yeah.

121

00:21:11.810 --> 00:21:12.930

Dan Fitzpatrick: NEM.

122

00:21:14.290 --> 00:21:15.620

Dan Fitzpatrick: Oh,

123

00:21:19.090 --> 00:21:34.150

Dan Fitzpatrick: Oh, I guess it… I guess it's now Toronto. I don't know, I was… I was looking for something else. Yeah, I'm not gonna find it. But the bottom line is, gold is working. It's working really, really well, and so you would be well advised.

124

00:21:34.260 --> 00:21:46.690

Dan Fitzpatrick: just to stay long. We're in GDX at 5604, clear back here, and so that gives us over a 22% gain. And then LDOS,

125

00:21:47.110 --> 00:21:59.580

Dan Fitzpatrick: It did not fall back down here. Instead, it fell a little bit, and now it's finding some sideways consolidation, and at 180.39, we're in this stock at 150.

126

00:21:59.610 --> 00:22:14.649

Dan Fitzpatrick: Okay, and so this trade, if you're still in it, would be up at about 20% or so. So, our… our trades are doing really well, guys. I think they're doing really well. So I'm happy with them.

127

00:22:14.700 --> 00:22:22.440

Dan Fitzpatrick: And, I hope you are, too. I will look at one stock here, CLS.

128

00:22:23.300 --> 00:22:41.379

Dan Fitzpatrick: Nice volatility squeeze. I think it's too high to buy here, but it's not, too high to own. I think it's… I think this is working, really well. So, anyway, that's all I got for you today. I gotta go to, visit with a surgeon.

129

00:22:41.570 --> 00:22:49.220

Dan Fitzpatrick: Happily, not for me, but for my son. So, I gotta run, and I'll see y'all tomorrow.
